I. ENTRIES

209. Alagarswami, K. 1973
(Central Marine Fisheries Research Institute, Substation, Tuticorin).
The molluscan resources of the world - a review.
Seafd export J. 5(1):65-70.

Nutritive value of different molluscs have been discussed. Popularity of molluscs as food have also been discussed. Culture of molluscs and present status of molluscan fishery in India have been dealt with.

210. Anon 1973
Fishery development in Maharashtra State. Ibid, 5(1): 121-123.

211. _____ 1973
Seminar on inland fisheries in Gujarat - A review of the Proceedings. Ibid, 5(1):181-183.

212. Babu Rao, M. and S.K. Chattopadhyay 1968
(Zoological Survey of India, Calcutta)
Comparisn of the populations of gizzard shad, Anodontostoma chacunda (Hamilton) (Pisces: Clupcidae) from Godavari and Hooghly estuaries. Rec. zool. Surv. India, 66(1-4):237-247.

The populations of A. chacunda from Godavari and Hooghly estuaries have been compared statistically. According to the authors the populations were found to differ in six morphometric and meristic characters. 8 ref.

213. Balani, M.C. 1973
(Health Physics Division, Bhabha Atomic Research Centre, Trombay, Bombay-85).
Thermal responses in Catla catla fry. Curr. Sci., 42(17):601-602.

The effects of thermal shock on the fry of Catla catla have been discussed. The author reports that the MLT for catla fry is 36.0°C. 2 ref.

214. Balasubrahmanyam, R. 1973
(Central Institute of Fisheries Technology Craft and Gear Division, Cochin-11).
Some basic guide lines in the construction of "Ferro-cement" fishing boats. Seafd export J., 5(1):95-101.

Methods for construction of boats using steel and cement have been dealt with.

215. Bhatia, H.L.[1], C.A. Sastry[2] and R.K. Nigam[3] 1973
([1] & [3] Fisheries Department, Bhopal (M.P.). [2] Scientist, Central Public Health Engineering Research Institute, Zonal Centre, Madras).
Control of aquatic weeds from water bodies using grass carp. Indian J. Environ. Hlth., 15(2):92-99.

Possibility of using grass carp C. idella, in controlling some aquatic weeds like, Hydrilla sp., Najas sp. and others has been discussed. The preference of the weeds as food for C. idella has also been dealth with. 14 ref.

216. Bhatt, V.S. 1973
Our oceanographic interest in the Antarctic Ocean. Seafd export J., 5(4):129-133.

217. Bhattacherjee, D.P. 1973
(Joint Director, Export Inspection Council, Regional Office, Cochin).
Quality of fishery export . Ibid , 5(1):173-176.

218. Bhullar, K.S. 1973
(Commissioner of Fisheries, Gujarat).
Gujarat fisheries - Progress and prospects. Ibid., 5(1):21-24.

219. Borkar, V.D. 1973
(Maharashtra Association for the cultivation of Science, Poona-4).
Fossil fishes from the intertrappean beds of Surendra-nagar district, Saurashtra. Proc. Indian Acad. Sci., B, 78(4):181-193. 18 ref.

220. Bose, S. Victor Chandra 1971
Bacterial flora of fresh prawn collected in the off-shore region of Tuticorin. Madras J. Fish., 6 :90-94. 18 ref.

221. Capoor, S.S.P. and A.N. Mathur 1971
(Department of Zoology, Agra College, Agra).
A peculiar case of abnormality of the internal ear of Scoliodon sorrakowah (Cuvier). Agra Univ. J. Res. (Sci.), 20 Pt II: 55-61.

Abnormality of the internal ear along with a description of the anatomy of the same of Scoliodon sorrakowah has been presented.18ref.

222. Chandrasekharan, Freda and S. Ubaldraj 1971
(Marine Biological Station).
Effect of temperature and salinity on the inshore migrations of Sardinella fimbriata (Cuv. & Val.) in the Tuticorin waters. Madras J. Fish., 6:1-8.

Effects of temperature and salinity on the migration of S. fimbriata have been discussed. From their observations on fish landings the authors have concluded that temperature fluctuations have little effect on migration and S. fimbriata can tolerate temperature ranging between 25°6-30°3°C. 9 ref.

223. _____ 1971
(Marine Biological Station)
Observations on the marine fish landings at Tubicorin during 1964 and 1965. Ibid , 6:77-87.

224. Chandrasekharan, Reeda and S. Victor Chandra Bose 1971
(Marine Biological Station).
Free amino acids in Indian pearl oyster flesh. Ibid , 6:88-89.

225. Chidambaram, K. 1973
(Director, Marine Products Export Development Authority, Cochin).
The marine products export development Authority. Seafd export J., 5(1):75-76.

226. Chinnayya, B. 1973
(Department of Zoology, Govt. Junior College, S. Kota, Visakhapatnam, A.P.).
Digestive enzymes in a decapod crustacean Caridina weberi De Man. Proc. Indian Acad. Sci., 78(3):119-129.

An account of the digestive enzymes present in the hepatopancreas of C. weberi have been given. As reported by the author the activities of casbohydrases were found to be strong while proteinase and lipase were weak in this species. 21 ref.

227. Chondar, S.L. 1970
A study on the fecundity of Labeo gonius (Ham.)
J. Asiat. Soc., 12(1-4):115-123.

Deals with the fecundity of L. gonius. Relationship betw between fish weight and fecundity, fish length and fecundity, ovary weight and fecundity have also been discussed. 25 ref.

228. _____ 1973
(Regional Training Centre for Inland Fisheries Operatives, Agra (India)).
A possible separation of races of Gudusia chapra (Hamilton) by means of length-weight correlation. Proc. Indian Acad. Sci., B, 78(2):73-79. 17 ref.

229. Desai, M.V.M., Elizabeth Mathew and A.K. Ganguli 1972
(Health Physics Division, Bhabha Atomic Research Centre, Bombay).
Interaction of some metal ions with fluvic acid isolated from marine environment. J. mar. biol. Ass. India, 14(1):391-394. 10 ref.

230. Dhawan, M. Rajinder 1972
(Research Laboratory, Directorate of Fisheries, Panaji, Goa).
Strandings of whales along Goa Coast. Ibid , 15(1): 410-411.

The morphometric measurements of one of the two specimens of whale collected from Goa coast have been presented. 2 ref.

231. Durairaj, S. 1971
A note on the Canning of white baits. Madras J. Fish., 6:121-123.

Methods for canning white baits have been presented. 2 ref.

232. Durairaj, S. and K.C. Joseph 1971
A note on the proximate composition of lobster meat (Panulirus sp.). Ibid , 6:113-115. 3 ref.

233. Dutt, S. 1973
(Department of Zoology, Andhra University Post graduate Centre, Guntur-5).
Over fishing on nursery grounds off Kakinada. Seafd export J., 5(1):55-56.

234. Eapen, P.K. & K.K.P. Menon 1973
(Tata Oil Mills Co. Ltd., (Fisheries Division) Cochin-5).
Common marine and fresh water fishes of Kerala. [illegible]
Ibid, 5(1):25-38.

A list of common freshwater and marine fishes and prawns together with their common english and local names is given.

235. Franklin, T. 1971
(Hydrobiological Research Laboratory, Madras-10).
A note on the occurrence of Pompholyx sulcata Gosse 1851-a rotifer in Chetpat swamp, Madras-10.
Madras J. Fish., 6:95-100.

236. George, A.I. 1973
(Director of Fisheries, Kerala).
Fisheries development scheme-- Puthiyappa puthiyangadi with assistance from the Agricultural refinance Corporation. Seafd export J., 5(1):17-19.

237. Gokhale, S.V. 1973
(Agricultural Finance Corporation Ltd., Bombay-16).
Fishery development corporation. Ibid , 5(1):11-16.

238. Gopalakrishna Iyer, T.S. 1973
(Central Institute of Fisheries Technology, Cochin-11).
Essentials of fish plant sanitation. Ibid , 5(2):19-30.

Sanitation and disinfecting of the instruments used in catching, landing and processing of fish are essential for the consumer against food borne diseases. Important factors pertaining to these have been discussed in detail. 10 ref.

239. Gopalakrishnan, V. 1973
(Central Inland Fisheries Research Institute, Barrackpore, West Bengal).
The pollution problem in Indian estuaries. Ibid, 5(1):83-86.

240. Gopinathan, C.K.[1] and S.Z. Qasim[2] 1972
(1National Institute of Oceanography, Panaji,
2Central Marine Fisheries Research Institute,
Cochin-18).
A critique on chlorinity, salinity and electrical
conductivity interrelationship of sea water. J. mar.
biol. Ass. India, 14(1):293-299. 18 ref.

241. Govindan Kutty, P.G.[1] and N. Balakrishnan Nair[2] 1972
(1Department of Zoology, Christ College, Irinjalakuda,
Kerala. 2Marine Biological Laboratory Aquarium,
Trivandrum-7, Kerala).
Observations on the breeding periods of certain
interstitial nematodes, gastrotriche and copepods of
the south west coast of India. Ibid, 14(1):402-406.
10 ref.

242. Govindan, T.K. 1973
Freeze drying and its application in fish preservation.
Seafd export J., 5(1):139-148.

Process of freeze drying advantages of freeze drying,
application of freeze drying for the preservation of fish, its
economics etc. have been discussed.

243. Husnain Ul Abser[1], A. Qayyum Siddiqui[2] and Shaikh Amjad Ali[3] 1973
(1Faculty of Fisheries, Laboratory of Biochemistry,
Hakodate 041, Japan. 2 & 3Department of Zoology,
Aligarh Muslim University).
Haemoglobin polymorphism in the air breathing climbing
perch, Anabas testudineus (Bl.). Curr. Sci., 42(19):
691-692. 10 ref.

244. _____ 1973
(Department of Zoology, Aligarh Muslim University, Aligarh).
Starch gel electrophoretic studies on the serum, haemoglobin, eye lense and some other tissue proteins of Ophicephalus marulius (Bloch), soluble in low ionic strength salt solution. Indian J. exp. Biol., 11(4):347-349.

Results obtained by starch gel eletrophoresis of low lonic strength extracts of different bodyparts like skeletal and cardiae muscle, spleen, kidney, eye lense etc. of Channa matrulius have been presented. Haemoglobin showed a consistancy within the species while serum protein showed variation as was observed from the electrophoretic studies by the authors . 13 ref.

245. Hughes, G.M.[1] and J.S. Datta Munshi[2] 1973
([1]Research Unit for Comparative Animal Respiration. The University, Woodland Road, Bristol. [2]Department of Zoology, Bhagalpur University, Bhagalpur-7, Bihar, India).
Fine structure of the respiratory organs of climbing perch, Anabas testudineus (Pisces: Anabantidae). J. Zool., Lond., 170:201-225.

Electron microscopic structures of three types of respiratory organs of A. testudineus have been described. The authors are of opinion that electron microscopy does not support the hypothesis that air breathing organs are modifications of functional gills in the fish. 31 ref.

246. [illegible][1] 1973 [illegible][2]
([1]Research Unit for Comparative Animal Respiration, the University, Woodland Road, Bristol. [2]Post graduate Department of Zoology, Bhagalpur University, Bhagalpur, Bihar-7, India).
Nature of the air-breathing organs of the Indian fishes Channa, Amphipnous, Clarias and Saccobranchus as shown by electron microscopy. Ibid, 170:245-270. 30 ref.

247. Hughes, G.M.[1], S.C. Dube[2] and J.S. Datta Munshi[3] 1973
([1]Research Unit for Comparative Animal Respiration, The University, Wood land Road, Bristol. [2&3]Postgraduate Department of Zoology, Bhagalpur University, Bhagalpur, Bihar, India).
Surface area of the respiratory organs of the climbing perch, Anabas testudineus (Pisces:Anabantidae). Ibid, 170:227-243.

Relationship between body weight and total surface area of gills and accessory respiratory organs in Anabas testudineus has been described. The authors report that though the gill area of Anabas is small, the total respiratory surface is of the same order as that of inactive water breathing fish. 2# 25 ref.

248. Jacob, P.G. 1973
(Central Marine Fisheries Research Institute, Cochin-11).
Marine turtle - a valuable resource from the Oceans. Seafd export J., 5(1):149-151.

249. Jana, B.B. 1973
(Department of Zoology, Visva-Bharati University, Santiniketan, West Bengal, India).
The thermal springs of Bakreswar, India. Physico-chemical conditions, flora and fauna. Hydrobiologia, 41(3):291-307.

Physico-chemical and biological characteristics of 7 thermal and one cold springs of Bakreswar, West Bengal have been presented. 53 ref.

250. Joglekar, Asha and M. Babu Rao 1967
(Zoological Survey of India, 8, Lindsay Street, Calcutta-1).
Observations on the systematic of Hooghly estuary mullets (Pisces: Mugilidae). Ichthyologica, 6(1&2): 5-12.

Characteristic features of the Mugil spp. of Hooghly estuary have been discussed in detail. M. parsia has been divided in three groups depending upon the morphometric and meristic characters. A key for identification of the mullet species of the Hooghly estuary has also been given. 14 ref.

251. Joseph, K.C., Victor Chandra Bose and P. Jeyachandra 1971
Studies on spoilage of sardines during handling and preservation in ice. Madras J. Fish., 6:116-120. 13 ref.

252. Joseph, K.M. 1973
The present status of mechanised fishing along Kerala Coast. Seafd. export J., 5(1):39-47. 16 ref.

253. Koeing, Fred 1973
(Pan American Seafoods Inc., U.S.A.).
1972 - An year to remember. Ibid, 5(1):91-92.

254. Krishnaswamy, S. Dilal and B.L.K. Somayajulu 1972
(Tata Institute of Fundamental Research, Homi Bhabha Road, Bombay).
Trace elements in marine environment : Extraction techniques and results. J. mar. biol. Ass., India, 14(1):372-383.

Extraction techniques of trace elements from waters upto 3,500 m depth in the ocean, have been described. Implications of the use of radio isotopes of uranium, thorium etc. have been discussed. 43 ref.

255. Kurian, C.V. 1973
(Department of Marine Sciences, University of Cochin, Cochin-16).
Fisheries education in India.. Seafd export J., 5(1): 177-179.

256. Mahadevan Pillai, P.K. 1972
(Regional centre of Central Marine Fisheries Research Institute, Mandapam Camp).
On the landing of a whale shark, Rhincodon typus Smith at Tuticorin. J. mar. biol. Ass. India, 14(1):408-409.

Morphometric measurements of a male whale shark caught near Hare island have been given. 1 ref.

257. Malhotra,Y.R. and M.K. Joyti 1967
(University of Jammu & Kashmir, Srinagar, Kashmir).
Studies on the morphology and Histology of the testes of a Kashmir fish Schizothorax niger Heckel.
Ichthyologica, 6(1 & 2): 1-4. 11 ref.

258. Menon, A.G.K. and P.K. Talwar 1968
(Zoological Survey of India, Calcutta)
Fishes of the Great Nicobar expedition, 1966 with description of a new gobioid fish of the family Kraemeriidae. Rec. zool. Surv. India, 66(1-4):35-61.
18 ref.

259. Menon, A.G.K. 1973
(Division of Fishes, Zoological Survey of India, Calcutta-13).
Origin of freshwater fish fauna of India. Curr. Sci., 42(16):553-556.

From the evidences of geographical distribution and palaeontology of fishes in the region the author has discussed the possible origin of Indian freshwater fishes and their subsequent spread along the Himalayas during pliocene and pleistocene times. 10 ref.

260. Menon, K.N. 1973
(Superintendent of Fisheries (Biology), Inland Fisheries Research Station, Ukai, Gujarat).
Development of fisheries in UKAI reservoir, Gujarat.
Seafd export J., 5(1):57-60.

261. Mitra, Eva and S.C. Thakurta 1973
(Central Inland Fisheries Research Station, Calcutta).
Control of Daphnia species by copper sulphate treatment.
Sci. & Cult., 39(10):467-468.

Destruction of common carp (C. carpio) fry by Daphnia spp. in sewage fed ponds has been reported. Control of Daphnia spp. by $CuSo_4$ treatment (in 0.02 ppm conc.) has been discussed in the present paper. 7 ref.

262. Mukherjee, R.P. and R.K. Ghosh 1968
(Zoological Survey of India, Calcutta).
Studies on some amphibian trematodes from West Bengal and Maharashtra (Part II). Rec. zool. Surv. India, 66(1-4):273-276.

Different trematode parasites collected from different species of frogs and toads have been dealt with. These parasites were collected from West Bengal and Maharashtra.

263. Muthu, Sathiavani 1973
(Minister for Fisheries, Government of Tamil Nadu, Madras).
Tamil Nadu fisheries - at a glance. Seafd export J., 5(1):71-73.

264. Nammalwar, P. 1973
(Central Marine Fisheries Research Institute, Sub-station Bombay).
A shortnote of the biometry of Nemipterus japonicus (Bloch) in relation to sex in Porto-Novo waters. Sci. & Cult., 39(8):349-350.

14 different parameters, measured in relation to standard length, in both the sexes of N. japonicus have been discussed. 4 ref.

265. Natarajan, V. 1971
(Freshwater Biological Research Station, Bhavanisagar).
Biology and fishery of Labeo calbasu (Hamilton) in Bhavanisagar reservoir. Madras J. Fish., 6:14-56. 52 ref.

266. _____ 1971
(Freshwater Biological Research Station, Bhavanisagar). Report on the spawn prospecting investigations in the Cauvery river. Ibid , 6: 57-76.

267. Nath, C.N. 1972
(Marine Biology Laboratory, Trivandrum - 7, South India). On the sortage of calcium in Splaeomysis, a subterranean mysid. Crustaceana , Supplement 3 :351-353. 5 ref.

268. Nath, G.N., D.M. Thampy and N.K. Pillai 1972
(Marine Biology Laboratory, Trivandrum-7, South India). A note on the androgenic gland of a mysidacean, Spelaeomysis longiceps (Pillai & Mariamma). Ibid, 3 : 354-356. 9 ref.

269. Nath, P. Rabindra 1972
(Department of Zoology, N.S.S. College, Changanasserry-2, Kerala, India).
A new species of Podocerus Leach (Amphipoda) with a redescription of Podocerus brasiliensis (Dana, 1853). Ibid, 3 : 299-307 . 17 ref.

270. Nayar, K.P. Leela 1973
(Deputy Director (FI) Small Industries Service Institute, Guindy, Madras-32).
Marine food industry in Kanyakumari Tirunelveli districts of Tamil Nadu. Seafd export J., 5(1):103-106.

271. Patil, H.B., G.B. Dodakundi and S.S. Rodgi 1973
(Department of Zoology, Karnatak University, Dharwar-3). Succession and stratification of organisms in Sewage oxidation pond. Indian J. exp. Biol., 11(4):318-320.

Observations on the ecological succession of micro-organisms in a sewage oxidation pond have been discussed. 19 ref.

272. Peter, K.J. 1973
(Scientist, Regional Centre of Institute of Oceanography, Cochin - 18).
Baby mackerel. Seafd export J., 5(2):31-33.

Different larval and post larval stages of *R. kanagurta* have been described. 7 ref.

273. Pillai, P. Parameswaran and C.P. Gopinathan 1973
(Central Marine Fisheries Research Institute, Cochin-11).
Production and exploitation of living marine resources.
Ibid , 5(1):169-172.

274. Pillai, R.S. and S.K. Chanda 1973
(Zoological Survey of India, Risa Colony, Sillong-3).
Philautus shillongensis, a new frog (Ranidae) from Meghalaya, India. Proc. Indian Acad. Sci., B, 78(2): 30-36. 3 ref.

275. Pillai, T.N.V and A.K. Ganguli 1972
(Health Physics Division, Bhabha Atomic Research Centre, Bombay).
Nucleic acid in the dissolved constituents of sea water.
J. mar. biol. Ass. India, 14(1):384-390.

Comparative accounts of nucleic acid isolated from sea water and standard DNA have been presented. The sea water, collected from Bombay Harbour Bay, has been reported to contain about 20 mg DNA/Litre. 1 ref.

276. Pillai, V. Narayana 1973
(Central Institute of Fisheries Operatives, Cochin-16).
Mixing processes in the sea in relation to fisheries.
Seafd export J., 5(1):77-82. 11 ref.

277. Puthran, V.A. 1973
(Central Institute of Fisheries Operatives , Cochin-16).
Indian skippers. Ibid, 5(1):159-163.

278. Raghuraman, R. 1973
(Zoology Department, Bangalore University, Bangalore).
Rate and efficiency of conversion in the fish, Polyacanthus cupanus Cuvier & Valencies, fed different quantities of food. Indian J. exp. Biol., 11(3):249-250. 6 ref.

279. Rajagopalan, S[1], G.J. Mohan Rao[2], D. Raghuraman, M.K. Abdullappa, A.C. Manuel and C.G. Mehta 1973
([1]Scientist, Central Public Health Engineering Research Institute, Ahmedabad Zonal Centre. [2]Scientist, Central Public Health Engineering Research Institute, Nagpur-20).
Pollution of Mahi river. Indian J. Environ. Hlth., 15(2):100-110.

280. Ramachandran, V.S. 1973
(Central Institute of fisheries Operatives, Cochin)
Pattern of Financial assistance for the fishing industry in Gujarat. Seafd export J., 5(1):87-90.

281. Ramlakshman 1972
(Zoological Survey of India, Calcutta).
A note on an abnormality in Nichollsia kashiensis Chopra & Tiwari, 1949 (Isopoda, phreatoicoidea).
Crustaceana suppl. 3 : 7-10.

Abnormalities of some cephalothoracic appendages of the isopod N. kashiensis have been presented.

282. Ranade, M.R., P.C. Raja and A.M. Ranade 1973
(Marine Biological Research Station, Kon Kan Agricultural University, Peth Killa, Ratnagiri).
A note on the growth of the green mussel Mytilus viridis (Linn.) in Ratnagiri waters. Curr. Sci., 42(16): 584 p. 1 ref.

283. Rangaswami, G. 1973
(Vice-Chancellor, Tamil Nadu Agricultural University, Coimbatore).
Need for expansion of fisheries education and research in Tamil Nadu. Seafd export J., 5(1):49-54.

284. Ravichandra Reddy, S[1] and T.J. Pandian[2] 1973
([1]Zoology Department, Bangalore University, Bangalore-1. [2]Madurai University, P.G. Centre, Sri Palani Andavar Arts College, Palani, Tamil Nadu).
Effect of volume of water on predatory efficiency of the fish Gambusia affinis . Curr. Sci., 42(18):644-645.

Predatory efficiency of the fish, G. affinis in relation to volume of water has been discussed. 6 ref.

285. Reddy, K.N. and G. Ramakrishna 1968
(Zoological Survey of India, Calcutta).
On the pagurid crabs (Crustacea- Decapoda) from Andaman and Nicobar islands. Rec. zool. Surv. India, 66(1-4): 19-30.

Pagurid crabs collected from the coastal regions of the Andamans have been described. The authors report that eight species are of special interest since they have been recorded for the first time from these islands. 8 ref.

286. Rivlin, Edward 1973
(Arista Industries Inc., New York).
Reassertion of the Law of supply and demand.
Seafd export J., 5(1):93-94.

287. Russell, S. Robert 1973
(President Seastar Inc., New York).
The rise and fall of the American shrimp market.
Ibid, 5(1):117-120.

Market status of Indian shrimp in U.S.A. has been discussed. The author has suggested some measures for the improvement of Indian shrimp supply to U.S.A.

288. Sachidanandam, A 1973
(Regional Evaluation Office, Shastri Bhavan, Madras-6).
Freezing and cold storage for fisheries exports. Ibid, 5(2):13-17.

289. Saha Namita and D.N. Ray Chaudhuri 1973
(Entomology Laboratory, Department of Zoology, University of Calcutta, 35 Ballygunge Circular Road, Calcutta-19).
A note on the bacterial flora in the gut of the crab, Scylla serrata (Forskal) (Crustacea : Decapoda). Sci. & Cult., 39(8):361-363. 2 ref.

290. Sahai, R. and D.S. Chawla 1967
(Dairy Science College, National Dairy Research Institute, Karnal (Haryana) India).
The heart of Labeo rohita (Ham.) with special reference to the conducting system. Ichthyologica, 6(1 & 2):31-36.

Anatomy and histology of the heart of L. rohita have been described. Specialised conducting structures of the heart have also been described. 24 ref.

291. Samuel, C.T. 1973
(Cochin University, Cochin).
Progress of fisheries in India since 1947. Seafd export J., 5(1):165-168.

292. Saralya, K.V. 1973
(The Marine Products Processing Training Centre, Mangalore).
Five essentials for success in Canning of fishery products. Ibid, 5(1):153-157.

293. Sarojini, R. and R. Nagabhushanam 1968
(Zoology Department, Marathwada University, Aurangabad).
Pagurid crabs (Decapoda, Anomura) from Waltair coast. Rec. zool. Surv. India, 66(1-4):249-272. 6 ref.

294. Saxena, Devendra, B. 1967
(Post Box No. 64 Srinagar (Kashmir) India).
Studies on the physiology of respiration in fishes. VIII Functional anatomy of the respiratory organs of the air-breathing fish, Ophicephalus punctatus , with remarks on the modifications in the vascular system of Teleostomi due to air breathing habits. Ichthyologica 8(1&2):13-30.

Anatomy of the gills and accessory respiratory organs of C. punctatus with special reference to blood circulation through this region have been presented. Modifications in the vascular system of different air breathing fishes due to their peculiar air-breathing habits have also been given. 33 ref.

(Department of Zoology, Andhra University, Waltair, South India).
Studies on the tube-building amphipod Corophium triaenonyx stebbing from Visakhapatnam harbour:Effect of salinity and temperature. Biol. Bull., 144:503-510. 18 ref.

301. Silas, E.G. and G.S.D. Selvaraj 1972
(Central Marine Fisheries Research Institute, Cochin).
Descriptions of the adult and embryo of the bramble shark Echinorhinus brucus (Bonnaterre) obtained from the continental slope of India. J. mar. biol. Ass. India, 14(1):395-401.

Describes the adult and a 300 mm embryo of the shark E. brucus collected from Gulf of Mannar. Chemical analysis of the flesh and liver have also been given. 7 ref.

302. Singh, C.P. 1967
(Department of Zoology, L.S. College, University of Bihar, Muzaffarpur (Bihar), India).
Histological note on the head-skin of a clupeid fish, Hilsa ilisha (Ham.). Ichthyologica, 6(1 & 2):37-39. 10 ref.

303. Sinha, A.B. and Y.N. Srivastava 1973
(P.G. Department of Botany, St. Audrew's College, Gorakhpur, U.P.).
Unusual formation of winter Apices of Potamogeton crispus L. during summer season. Curr. Sci., 42(19):698p. 6 ref.

304. Sinha, N.K. and R. Tilak 1968
(Zoological Survey of India, Calcutta).
Bilateral asymmetry in paired meristic and morphometric characters of Labeo dero (Hamilton) : Cyprinidae, Cypriniformes. Rec. zool. Surv. India, 66(1-4):7-18.

The results of observations on the asymmetry of 5 meristic and 7 morphometric characters have been discussed. The authors report that the fish, L. dero exhibits some asymmetry in respect to all the 12 characters examined. Females show more asymmetry in meristic characters and moles in morphometric characters. 6 ref.

(Hydrobiological laboratories, Madras-10).
Limnology and productivity of poodi reservoir.
Madras J. Fish., 6;101-112.

Physico-chemical and biological conditions of the reservoir have been discussed. 21 ref.

306. Sreenivasan, A. 1971
(Hydrobiological Research Station, Madras-10).
Liming of an upland lake. Ibid, 6:9-13.

Effects of lime treatment in the lake have been discussed. The author is of opinion that in adverse chemical conditions of water liming helps in improving the water condition to a good extent. 11 ref.

307. Subba Rao, M.V. and M.K. Behera 1973
(Post-Graduate Department of Zoology, Ravenshaw College, Cuttack-3, Orissa).
A haematological study on the freshwater teleost, Catla catla. Curr. Sci., 42(17):612-613.

Haemoglobin concentration, clotting time, R.B.C. and W.B.C. counts etc. of the blood of C. catla are given. The mean haemoglobin concentration and R.B.C. count are reported to be higher in males than in females. 8 ref.

308. Subrahmanyam, M. 1973
(Central Inland Fisheries Research Institute, Barrackpore, West Bengal).
Capture and cultivation of the tropical giant freshwater prawn Macrobrachium rosenbergii. Seafd export J., 5(1):125-128.

Distribution, fishery and biology of the prawn M. rosenbergii have been dealt with. Cultivation process of the prawn has also been discussed.

309. Swaminathan, M.S. 1973
(Director General, Indian Council of Agricultural Research).
Malnutrition in a twotier world. Everyman's Science, 8(3):101-105.

Different factors responsible for malnutrition have been elucidated. Problems of fish production and exploitation of new resources have also been discussed.

310. Swarup, H. 1967
(School of studies in Zoology, Vikram University, Ujjain).
Gonads in triploid fish. Ichthyologica, 6(1&2):41-52.

Results of gonad analysis of 24 triploid Gasterosteus aculeatus have been discussed. 22 ref.

IV. CUMULATIVE TAXONOMIC INDEX, VOL 12, Nos. 1-4

(Based on the taxonomic terms of fishes occurring in the titles of entries. Names of the authorities have been omitted from taxonomic terms. Reference is given to the serial number of the entry.)

Abalistis stellaris ... (4) : 234
Ablennes hians ... (3) : 155
Abudefduf bengalensis ... (4) : 258
A. biocellatus ... (4) : 258
A. cyaneus ... (4) : 258
A. glaucus ... (4) : 258
A. modestus ... (4) : 258
A. septemfasciatus ... (4) : 258
Acanthophthalmus goaensis ... (1) : 71
Acanthopthalamus sp. ... (4) : 259
Acanthurus triostegus ... (4) : 234
Acentrogobius cyanomos ... (3) : 200
A. neilli ... (?) : 29
A. reichei ... (4) : 258
Acetes cilieris ... (4) : 234
A. crythraeus ... (2) : 128
A. indicus ... (2) : 128
(4) : 234
Aetobatus flagellum ... (4) : 234
Aetomylus nichofii ... (4) : 234
Ailia sp. ... (4) : 259
Alectis indicus ... (3) : 200
Allanetta foskali ... (4) : 288
Ambasus buton ... (4) : 258
A. commersonii ... (4) : 258
A. dayi ... (4) : 234
A. gymnocephalus ... (1) : 29,234 & 258
A. interrupta ... (3) : 200
A. nama ... (1) : 37 & 41
A. ranga ... (1) : 37
Ambassis spp. ... (4) : 234
A. urotaenia ... (1) : 29
(4) : 25
(3) : 201
Amblyceps mangois ... (4) : 259
Ambhyceps sp. ...

Amblypharyngodon melettinus	...	(4) : 234
A. mola	...	(1) : 35,37,41& 44
		(3) : 187
		(4) : 234
Amblypharyngodon sp.	...	(4) : 259
Amphipnous sp.	...	(4) : 246 & 259
Anabas testudineus	...	(1) : 21,30 & 44
		(4) : 243,245,247 & 259
Anampses sp.	...	(3) : 200
Anchoviella commersonii	...	(4) : 234
A. indica	...	(1) : 29
A. heterolobus	...	(4) : 234
Anchoviella spp.	...	(2) : 83
Angasia armata	...	(2) : 122
Anguilla bengalensis	...	(4) : 234
A. bicolor	...	(4) : 258
Anodontostoma chacunda	...	(2) : 83
		(4) : 212 & 234
Antennarius hispidus	...	(3) : 200
Aphanius dispar	...	(1) : 35
Aphareus furcatus	...	(3) : 152
A. rutilans	...	(3) : 152
Apistus carinatus	...	(3) : 200
Aplocheilus blochii	...	(1) : 35
A. lineatum	...	(4) : 234
A. panchax	...	(4) : 234
Apogon frenatus	...	(3) : 200
Aprion virescens	...	(3) : 152
Apsilus fuscus	...	(3) : 152
A. zonatus	...	(3) : 152
Archamia lineolata	...	(3) : 200
Aristichthys nobilis	...	(1) : 67
Artemia salina	...	(3) : 134
Arthron reticularis	...	(4) : 235
Aspidoparia morar	...	(1) : 41
		(3) : 201
Atelomycterus marmoratum	...	(4) : 234
Atractoscion auquidens	...	(3) : 152
Atropus atropus	...	(4) : 234
Atrosalarias fucus	...	(4) : 258
Autisthes puta	...	(3) : 200
Auxis thazard	...	(4) : 234
A. thynnoides	...	(4) : 234

Badis badis ... (3) : 201
Badis sp. ... ... (4) : 259
Bagarius sp. ... ... (4) : 259
Balitora sp. ... ... (4) : 259
Barbus melanampyx ... (1) : 2
B. tetrazona ... (1) : 61
Barilus barila ... ... (1) : 41
(3) : 201
B. barna ... ... (1) : 35 & 41
B. bendelisis ... (3) : 163 & 201
B. modestus ... (3) : 201
B. shacra ... (3) : 201
B. vagra ... (3) : 201
Barytelphusa guerini ... (4) : 315
Belone spp. ... (4) : 291
Blennius cristatus ... (3) : 200
Boleopthalmus boddaerti ... ... (3) : 200
